

Bi-weekly Team Report 1 - 16th October 2015

IBM1 - TEAM 10

- Jasmine Lu | Team leader
- Ivan Jasjko
- Darian Sastre-Stanescu

Our Client

- Mr. Tahir Khan
- Mrs. Sarah Frodsham
- Mr. Chris D'Arcy

Past meetings

- Tuesday 13th October 09:00 - 09:30 (conference call)

Initial Meeting Notes

Project Scope:

- "Effortless and Secure Banking" project's aim is to create a secure access to banking services without having to remember complex multi-digit passwords.
- No major design constraints, thus can be developed for any platform.
- Introduce "layers of reassurance" for effortless security using authentication methods such as time, geolocation and biometrics.
- May involve the use of additional hardware e.g smart watches.

Possible Solutions:

- Multiple factor authentication (time, location, passwords, biometrics)
- Sending links via SMS
- Use of the phone camera
- Predicting needs based on statistics - suggesting investments based on financial profile/balances/spending trends

Next meeting

- 23rd October 2015 15:00 - 15:45 at UCL

Before next meeting

- Create powerpoint to be presented to client relaying information from the initial meeting.
- Think of possible solution ideas, also to be presented to the client at the next meeting.

Next 2 weeks

- After the second meeting, we should have a refined list of requirements for our project.
- Start building a website that will showcase the context, research and progress of our project.
